

Money Mysteries Solved

This program is designed for grades K-8 to teach students about money in an age-appropriate way. People of all ages are intrigued by money, but sometimes problems can arise. Children can make smart money decisions with the skills learned from this program. This program can be used to help meet state goals for understanding economic systems.

After this program, students will know:

- What is money?
- How is money counted?
- What are the different ways you can pay for things?
- When is it okay to spend money?

Money Mysteries Solved

1st performance ... \$450
2nd performance ... \$300
All day price \$950

Students will also learn:

How do my parents make money?

How much should I save?

What is a credit card, and when should I use it?

Paul Niemann is a syndicated newspaper columnist. He has taught college level business courses for the past 8 years, and is the author of 2 books and 3 DVD's on inventions and history.
